

The Art of Biomimicry

What nature knows about design

14] For its ICFF debut, Port Washington, N.Y.-based Justin Aiello Furniture Design will display the Zanna coffee table, which features corrosion-resistant, cast-aluminum legs with a painted-metallic finish. A patented attachment system enables a 1/2-inch-thick piece of glass to sit securely on top. (516)767-0179

15] Now that its trademark honeycomb panels have been used in Prada's New York boutique, Santa Monica, Calif.-based Panelite debuts its Polymer Series of panels. Composed of transparent honeycomb cores with polyester resin facings, the lightweight, translucent interior building material comes in unlimited color choices. www.e-panelite.com

16] The patent-pending Room Divider CD Rack holds 96 CDs, front and back. Debuted by Joey Manic Inc. of Capitol Heights, Md., it's constructed of a flexible, velvet-finished translucent polycarbonate, with translucent PVC tubing, aluminum fasteners and a powder-coated tubular-steel frame that can be disassembled. www.joeymanic.com

17] Brooklyn, N.Y.-based Nollette Studio introduces its Cube furniture line, including the Cube Planter. Fabricated from cast concrete and placed on a steel base with 3-inch locking casters, the planter is gray with exposed aggregate. www.nollettestudio.com
